Stepwise EnerPHit retrofit: New Certification Scheme

PHI building criteria update 2015

- All PHI building energy standards combined in one document
- Verification according to Renewable Primary Energy (PER) demand and generation (optional)
- Classification as Passive House or EnerPHit Classic, Plus and Premium
- Criteria for all standards applicable worldwide
- Introduction of the new PHI Low Energy Building Standard
- **Pre-certification for stepwise retrofit**

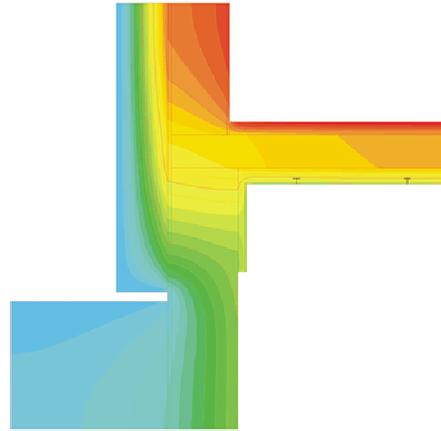

➤ **In effect for english-speaking users from late 2015
(Release of PHPP9 EN)**

Passive House standard for energy retrofits?

**Unfavourable
A/V ratio**

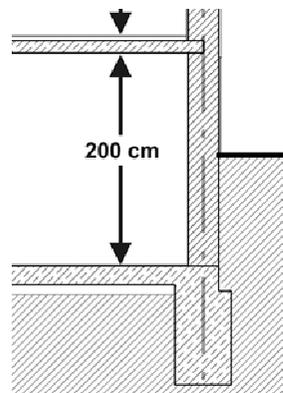

Thermal bridges

Airtightness

**Unfavourable
window orientation**

**No space
for insulation**

Heritage protection restrictions

| classic | plus | premium |

EnerPHit Standard

- Guideline and incentive for an optimal efficiency standard for retrofits
- Certification as quality assurance for building owners

„Energy Retrofit with Passive House Components“

Co-funded by the Intelligent Energy Europe
Programme of the European Union

www.europhit.eu

2010

EnerPHit Standard introduced for residential buildings in cool-temperate climates

2012

extended to non-residential buildings and buildings with interior insulation

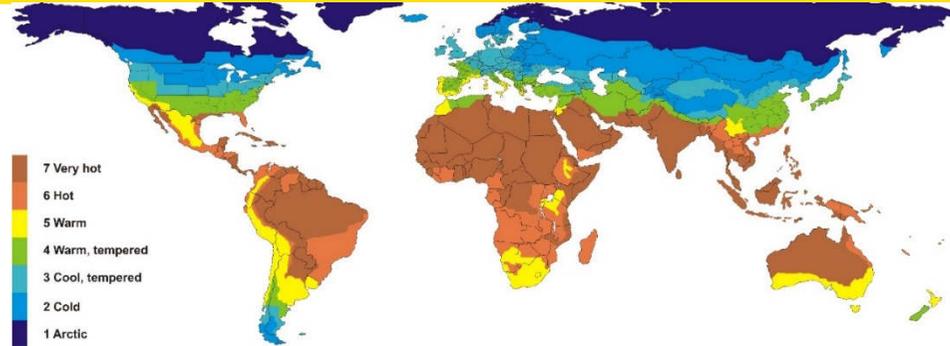

Late 2015 (April 2015 for German PHPP)

extended to all climates worldwide,
introduction of EnerPHit classes Classic, Plus,
and Premium

Late 2015 (for German and English PHPP)

pre-certification for stepwise retrofit to EnerPHit Standard

or alternatively,

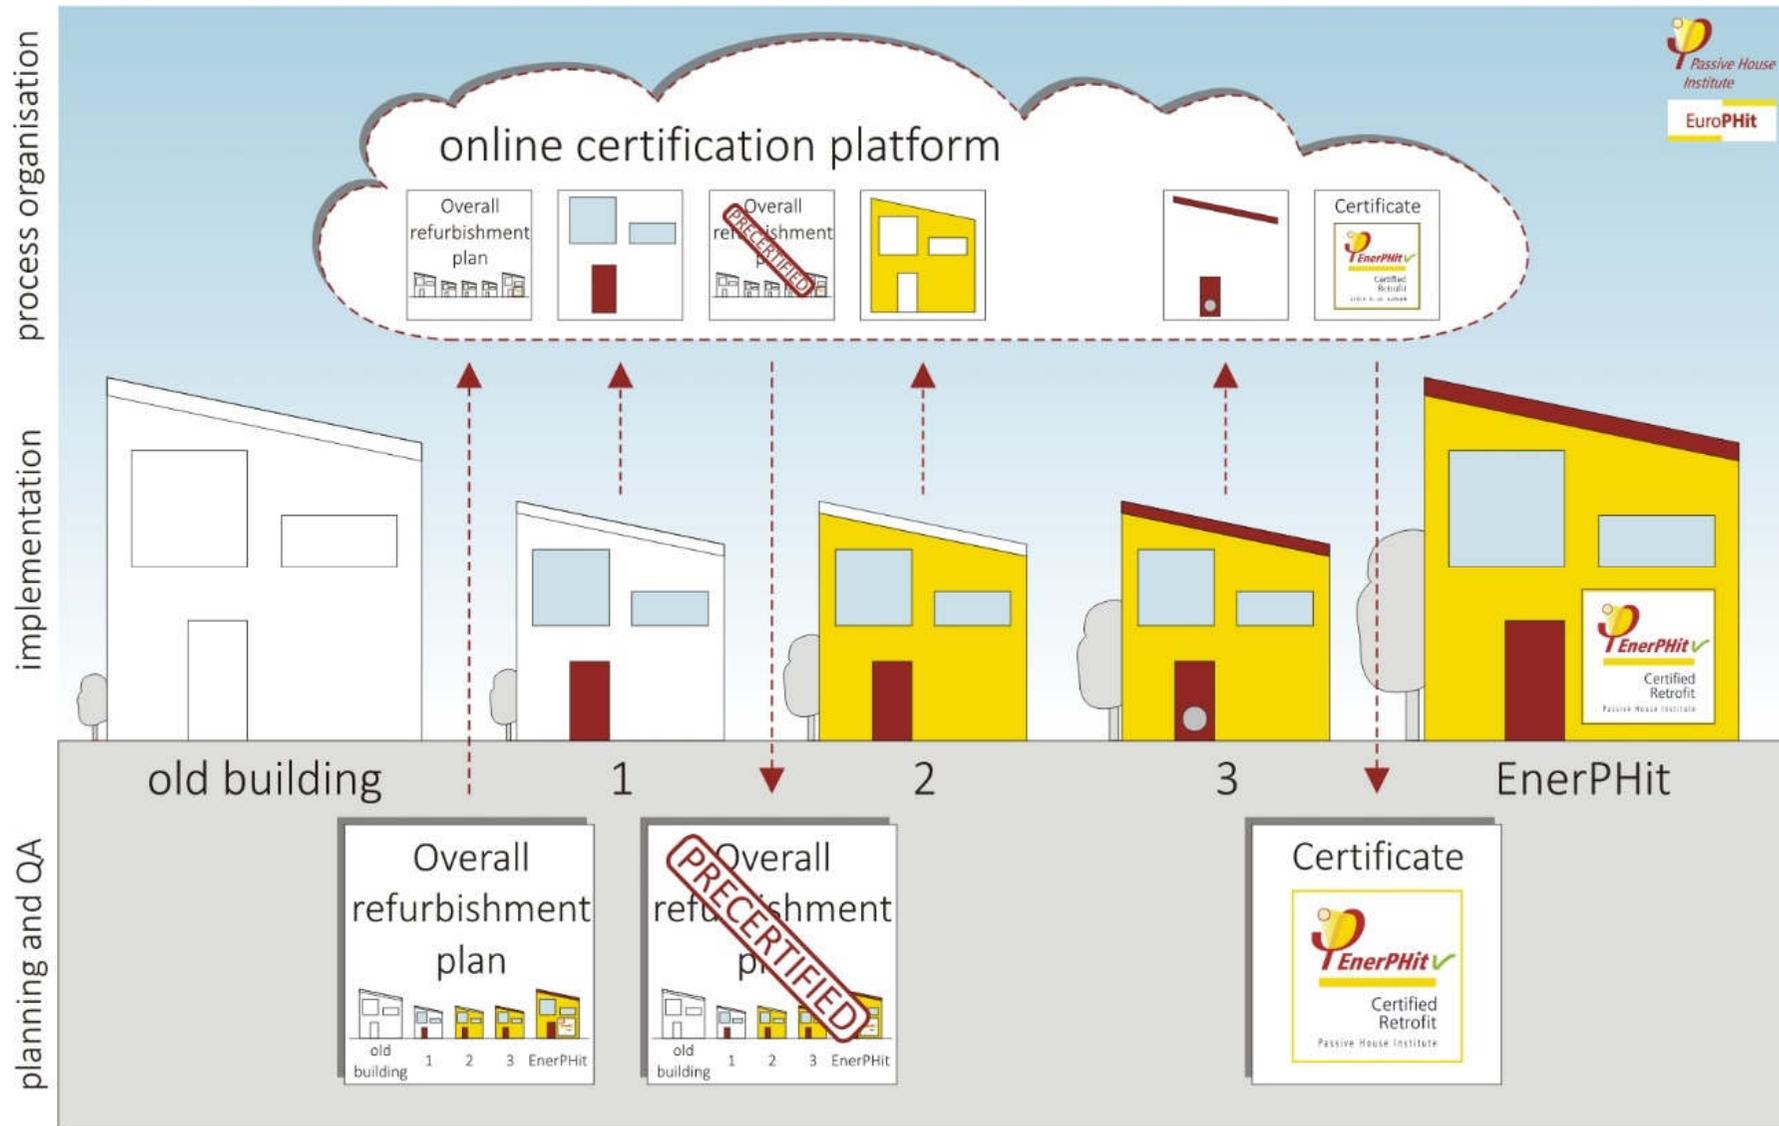

building component method:

energy demand method:

| Climate Zone according to PHPP | Opaque envelope ¹ against... | | | | Windows (including exterior doors) | | | Ventilation | | | |

- To develop **a tool which offers guidance** for the Passive House Designers and Certifiers **throughout the planning, building and certification processes;**
- To be **user-friendly, flexible and interactive;**
- To assure the **energy efficiency and quality of the design.**

Certifier

Designer

1. Login;
2. Create a designer account for your project's contact person;
3. Create a new project and customize the checklist according to the challenges;
4. Start working on the project.

1. You receive from the Certifier your Login information via email;
2. Login;
3. Start working on the project following a well structured checklist.

• New comment:

Keine Datei ausgewählt.

- 1. Have you made sure that the PHPP corresponds with the submitted documentation?
- 2. Are all the criteria for certification met?
- 3. Generally you should use the newest PHPP available, when the Client signed the contract with the Certifier. Have you done this?
- 4. Have additional worksheets been added to PHPP?
- 5. PHPP/Verification Sheet. Have you entered all information on the building, adress, type, use, construction year?
- 6. PHPP/Verification Sheet. Have you entered all information on building owner, architect ?
- 7. PHPP/Climate. Does the chosen climate correspond to the site?
- 8. PHPP/Climate. Is the Climate Data validated by the Passive House Institute?
- 8. Other questions you find suitable
